## OMEGA TRACKING AND RECOVERY

### A New Level Of Vehicle Security And Family Safety

Omega Tracking and Recovery is an Internet-based system that uses a combination of GPS satellite and smart phone technologies. It allows you to map the exact location, speed and direction of your vehicle, anywhere, nationwide. The Tracking and Recovery unit is concealed in your vehicle and transmits information that gives you up to three unique views of the vehicle's current location from any web browser.

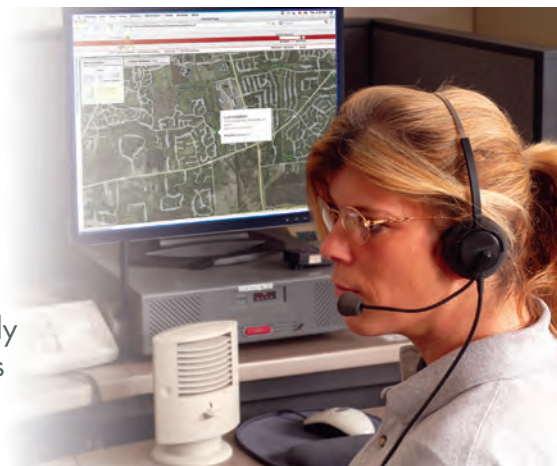

Traditional Street Map — "Bird's Eye" In Major Cities — Aerial Satellite

### Theft Recovery Assistance

From the moment you realize your vehicle has been stolen, you will work directly with a live Theft Recovery Assistant.

This recovery expert will coordinate communication with the police, instantly providing exact street-level coordinates to direct them to the stolen vehicle.

### Omega Theft Recovery vs Ground-Based Recovery

Our sophisticated technology is a dramatic advancement over traditional ground-based tracking systems, which rely on specially equipped police cars to randomly search the area for a radio signal from the stolen vehicle.

FEATURE	OMEGA	GROUND-BASED
Police receive exact street address in real-time	Yes	No
GPS location information	Yes	No
Internet mapping	Yes	No
Coverage throughout the US & Canada	Yes	No

### Solid, Reliable Security

The partner companies that developed the Omega Tracking and Recovery system represent over 50 years of combined security experience. Our monitoring facility was the first in North America awarded *ISO 27001 information security-related certification*. We are trusted with the security of government, financial, utility and health care customers, as well as commercial and residential security.

### More Than Theft Recovery

The ability to locate your vehicle at any time, and receive warning alerts by email and text message, gives the Omega Tracking and Recovery system a unique set of safety features. You can . . .

- ~ Find the location of a loved-one's vehicle from any Internet-equipped device
- ~ Receive an alert if the vehicle exceeds a pre-selected speed
- ~ Be alerted if the vehicle travels beyond a pre-determined perimeter

## **A NEW LEVEL OF VEHICLE SECURITY**

- ~ Internet-based GPS tracking
- ~ Live 24/7 Theft Recovery Assistant
- ~ Live call center for installation testing and system activation
- ~ Geo-fence alert boundaries from 1/8 to 300 miles
- ~ Excess speed alerts in selectable 5 mph increments from 45 to 95
- ~ Sophisticated multiple vehicle capabilities from one login
- ~ Internet mapping with aerial satellite and "Bird's Eye" view in major cities
- ~ History logs of location, commands and alerts
- ~ The industry's best pricing for on-going service plans – with flexible subscriptions from 1 day to 5 years

Auto Tracking – Your initial installation cost includes unlimited on-demand uses. When necessary, you may activate fee-based Auto Tracking to automatically track the vehicle at specific intervals for a selectable period of time.

If the vehicle is properly equipped, your Tracking and Recovery system can also be configured to:

- ~ Send alarm system activation alerts to 5 email addresses and text messages to 5 mobile devices
- ~ Warn of low vehicle battery
- ~ Unlock or lock doors
- ~ Control remote start or other vehicle accessories

## **FULL-FEATURED TRIAL PERIOD WITH INSTALLATION**

With dealer installation and owner registration, all system features become fully operational for 30 days. This unique trial period lets you determine the specific system features that match your lifestyle. Then, you can select the on-going plan that is right for you.

***Five years of "Theft Recovery Assistant" capability is included in the initial system cost, and automatically activates upon registration, even if you do not subscribe to any on-going service plan. For a nominal fee, Theft Recovery Capability can be extended for additional five year increments to protect your vehicle indefinitely.***
